**EXAMINER'S AMENDMENT and REASONS FOR ALLOWANCE**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert Voigt on 09-20-04.

The application has been amended as follows:

In the claims:

In claim 1, line 10, insert -- wherein said direct memory access controller is configured to poll each of said plurality of attached processing units to determine if any of said plurality of attached processing units completed its operation during said one or more remote procedure calls -- after "remote procedure calls".

In claim 24, line 13, insert -- by said direct memory access controller -- after "polling".

Art Unit: 2112

2. The following is an examiner's statement of reasons for allowance:

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claims 1, 13, and 24 include the limitation of direct memory access controller is configured to poll each of said plurality of attached processing units to determine if any of said plurality of attached processing units completed its operation during said one or more remote procedure calls, which not shown by the prior art of record, in the combination as disclosed and claimed.

Claims 8, 20, and 30 include the limitation of the direct memory access controller comprises a second queue, wherein the plurality of commands in the plurality of first queues are merged in said second queue, which is not shown by the prior art of record, in the combination as disclosed and claimed.

Claims 12, 23, and 27 include the limitation of the direct memory controller is configured to interrupt said corresponding processing unit at a synchronization point, wherein said synchronization point occurs after said one or more remote procedure calls are performed, which not shown by the prior art of record, in the combination as disclosed and claimed.

Claim 34 includes the limitation of the memory access controller comprises a second queue, wherein the plurality of commands in the plurality of first queues are expanded in said second queue, which is not shown by the prior art of record, in the combination as disclosed and claimed.
